

Instruction Manual DBF008

Winding up the movement

- By turning the movement back and forth 40 times, the movement can be completely wound up. Please do this whenever the movement has stopped ticking.

Setting time

- To set the time, gently pull and turn the crown at the same time.

Setting date by pressing the crown

- The date is set by pressing a pusher integrated in the crown.
- Do not set the date when the hands are at a position between 10 and 1.

Water resistance

- The watch has a water resistance of 20 ATM, meaning it can withstand a pressure of 20 bar (approx. 200 m).

Caution: To ensure that water doesn't enter the watch, don't use the crown of the DBF008 under water. Please note, the longevity of the leather straps are not guaranteed when worn underwater.
